How Do I Move SuperFox To A New Computer?

If you would like to move your SuperFox to a different computer (You might be upgrading the computer or passing your job on to someone else) just follow this simple procedure.

1. Make a final backup of our SuperFox data from the old computer.

2. Check that the new computer's date and time are set correctly.

3. Use your SuperFox installation CD to install SuperFox on the new computer and patch the installation if necessary.

4. On the new computer check that you have installed a default printer with a page size set to A4.

5. Start up SuperFox and log in for Full Access.

6. On the new computer use **Home > Backups & Tutorial Data > Restore a Backup >** to restore your data onto the new computer.

It is as easy as that! You should now be ready to start working with SuperFox on the new computer.
